

Please do not allow any lobbying groups or anyone else to limit satellite radio in any way. As an American I should be allowed to choose to listen to poor radio loaded with commercials and useless chatter (normal non-satellite radio) or pay a small monthly fee and get quality radio with great selection. Satellite radio should also be allowed to provide me with instant traffic and weather. Having this type of info available constantly at the push of a button is a safety issue (warnings on hazardous weather or road conditions), a pollution issue (avoiding large backups w/thousands of idling engines) and contributes to my productivity and my ability to contribute to the national economy. If commercial radio stations did a better job of providing what listeners want and need, satellite radio would never have evolved. Please do nothing to limit the service that my satellite radio company can provide.
